shredder lubricant sheet

directions:

DO NOT OPEN OR TEAR INDIVIDUAL SHREDDER LUBRICANT SHEET PRIOR TO USE.

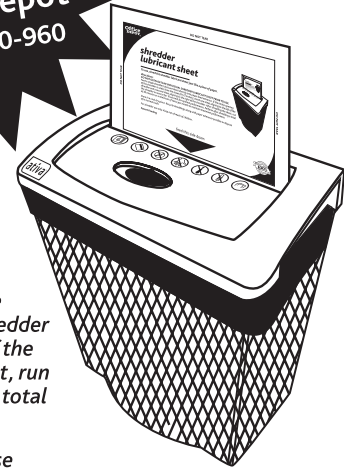

To use, shred this shredder lubricant sheet just like a piece of paper. Feed a single shredder lubricant sheet directly into paper feed entrance. If the intake opening of the shredder is wider than the sheet size 8 9/16 inches (21.8 cm), shred one sheet aligning to the left of the shredder and a second sheet aligning to the right of the shredder. After shredding the sheet, run the shredder in reverse for 10 seconds for optimal performance. Perform after shredding a total of 30 minutes or a minimum of twice per month to maintain maximum performance.

Store in a cool dry place. Recycle shreds along with paper whenever possible or dispose of in normal trash.

For shredder use only. Keep out of reach of children.
